Project Title	Coastal Sea Level Rise/Flooding and Sentic Systems Survey
Purpose of the Study	Coastal Sea Level Rise/Flooding and Septic Systems Survey This research is being conducted by Andrew Lazur at the University of
l arpooc of the otady	Maryland, College Park. We are inviting you to participate in this
	research project because you Are involved with Onsite wastewater
	systems in coastal areas. The purpose of this research project is
	gathering information form onsite professionals (local and state agencies,
	industry members and other stakeholders) on their perceptions of
	flooding and onsite systems, the type of policy, operational management
	practices or technologies that they use and have observed success in
	mitigating current and projected coastal flooding of onsite systems. The
	survey results will be shared with participants to facilitate knowledge
	transfer and discussion of this increasingly important issue.
Procedures	A link to an 11-question online Qualtrics survey will be distributed to
	stakeholders via email. The survey should take about 5 minutes to
	complete and will ask about the participant's understanding of coastal
	flooding impacts on onsite systems and ways to mitigate the issue. Example questions include: How would you describe your role in the
	onsite wastewater field? In which state do you work? Have you observed
	an increase in onsite systems exposed to flooding? What
	strategies/remediation approaches has your office employed with systems
	experiencing flooding? What do you think are effective strategies to
	remediate the impact of flooding?
Potential Risks and	There are no known risks to participating in this research study. You
Discomforts	can skip any question you do not wish to answer.
Potential Benefits	There are no direct benefits from participating in this research. However,
	possible benefits include participants will learn about how their peers or
	stakeholders perceive the issue and what solutions they have tried to mitigate flooding of onsite systems.
Confidentiality	Any potential loss of confidentiality will be minimized by storing all data
,	in password-protected computers and locked file cabinets and destroying
	data when the analyses are completed.
	Only the project investigators will have access to the data. If participant's
	email address information is voluntarily provided, this will be stored on the
	investigators secure University of Maryland computers for a period of 12 months post completion of survey. The purpose of collecting the email
	address is if the participant wants a copy of the survey summary.
	If we write a report or article about this research project, identity will be
	protected to the maximum extent possible. Your information may be
	shared with representatives of the University of Maryland, College Park or
	governmental authorities if you or someone else is in danger or if we are required to do so by law.
Right to Withdraw	Your participation in this research is completely voluntary. You may
and Questions	
	choose not to take part at all. If you decide to participate in this research,

you may stop participating at any time. Your decision to participate or not participate in this research study will not have a negative or positive impact on your relationship with University of Maryland Extension (UME) and their programs. If you decide to stop taking part in the study, if you have questions, concerns, or complaints, or if you need to report an injury related to the research, please contact the investigator: Andrew Lazur University of Maryland Extension Central MD Research and Education Center 2005 Largo Road Upper Marlboro, MD 20774 301-789-5256 lazur@umd.edu If you have questions about your rights as a research participant or wish to report a research-related injury, please contact: University of Maryland College Park Institutional Review Board Office 1204 Marie Mount Hall College Park, Maryland, 20742 E-mail: irb@umd.edu Telephone: 301-405-0678 IRBNet #2223260-1 This research has been reviewed according to the University of Maryland, College Park IRB procedures for research involving human subjects.
